BARNSTABLE TOWN COUNCIL

ITEM# 2026-005

INTRO: 07/17/2025, 08/21/2025, 01/29/2026, 02/12/2026, 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark S. Ells, Town Manager
THROUGH: James Kupfer, Director, Planning & Development Department
DATE: June 30, 2025
SUBJECT: Amending the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning, Article III District Regulations, to modify building height requirements in the Downtown Main Street District and Downtown Village District

BACKGROUND: These proposed zoning amendments follow discussions by the Town Council Ad-Hoc Subcommittee regarding necessary updates to Chapter 240 Zoning Ordinance. The Committee has recommended revising height restrictions in the Downtown Main Street District and Downtown Village District to better align with surrounding neighborhoods and prevent a "canyon effect" along Main Street. The amendments eliminate the fourth-story step-back requirement while lowering the overall maximum building height.

Zoning amendments are processed in accordance with Massachusetts General Law (MGL) Chapter 40A, Section 5. Adoption or change of zoning ordinances may be initiated by the submission to the Town Council of a proposed zoning ordinance by different parties, including the Town Council itself.

ANALYSIS: The proposed changes will reduce maximum allowable building heights within the Downtown Main Street District and Downtown Village District to ensure development remains compatible with existing structures and neighborhood character. The amendment may encourage a more varied and nuanced approach to building height regulations based on location and surrounding properties.

FISCAL IMPACT: There is no significant fiscal impact associated with this item.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, supports this item.

STAFF SUPPORT: James Kupfer, Director, Planning & Development Department

§ 240-24.1.6. Downtown Main Street District (DMS).

A. Intent.

1. The Downtown Main Street District is intended to promote the continuation of a walkable, pedestrian-oriented downtown environment with continuous active streetscape. Development is characterized by mid-rise (two- to three and one half-story ~~four~~) mixed-use buildings, continuous street walls and variety of materials with parking visually minimized. Land uses are mixed residential and active commercial, including retail, restaurant, office, hospitality, cultural and institutional.

B. Lot standards.

1. Newly platted lots must be dimensioned as specified by Table 3.
2. Building facades must have a minimum width that is equal to a percentage of a lot's width and is specified as the facade buildout by Table 3.
 - (a) Facade buildout is calculated by dividing the total width of all facades by the lot width and may be cumulatively calculated by multiple buildings.
 - (b) The open space of a forecourt is considered part of the building for the purpose of measuring building width and facade buildout.
 - (c) The SPGA may provide relief from the facade buildout requirements; the Board must find the issuance of the special permit is consistent with the design and infrastructure plan.

Facade Build Out

Single Building per Lot = $A \div B$

Multiple Buildings per Lot = $(A + A) \div B$

C. Building standards.

1. Multiple principal buildings are permitted per lot.
2. Principal buildings are permitted as specified by Table 3.
 - (a) Additional principal buildings are exempt from the required maximum front setback.
3. Principal building facade(s) must be built parallel to any primary front lot line, at or

§ 240-24.1.6

between the minimum and maximum front setbacks.

4. Any building contributing toward the frontage buildout for any lot fronting Main Street between Ocean Street and Sea Street must provide ground story commercial space that is at least 20 feet in depth for 100% of the total width of the building, excluding lobby entrances and other means of egress associated with the use of upper stories.
5. Awnings, canopies, signs, balconies, and non-habitable architectural features of a building may project over the public sidewalk but must provide at least eight feet of clearance and a license from the Town Manager in accordance with Barnstable General Ordinances, Part 1, Chapter 121, § 121-6J is required.
6. The ~~fourth~~ third and one half story of any building must be recessed ("stepped back") from the facade of the stories below at least eight feet.

7. Mechanical and stairwell penthouses and building systems equipment must be setback from any exterior wall a distance that is equal to their height.
 8. Facades may not have any blank wall areas without fenestration or architectural surface relief greater than 20 feet measured both vertically and horizontally for all stories of a building for any facade.
 9. Loading and service areas may not be visible from any public sidewalk of Main Street.
- D. Design guidelines.
1. The development of any new principal building should include a pedestrian passage connecting the sidewalk at the front of the property to any parking areas to the rear of the building, to every extent practicable, where no such pedestrian passage exists within 200 linear feet of the building's principal entrance.

2. When provided, pedestrian passages may be designed as an open-air passage between buildings, a covered atrium providing continuous protection from the elements, or as an up to two-story passage through a building.

E. Use provisions.

1. Limitations.

- (a) Occupation of a single commercial space greater than 5,000 square feet by any food and beverage service or retail sales use requires a special permit.
- (b) The maximum number of dwelling units permitted for any multiunit dwelling residential use is determined by the permitted dimensions of the building and the actual motor vehicle parking spaces provided on a lot as required by Table 2.

F. Site standards.

1. Driveways, vehicular entrances to parking lots or structures, and curb cuts may be no wider than 24 feet.

G. Landscape standards.

1. A front landscape area is not required if the front setback is zero. When a setback is greater than zero, those portions of the setback not occupied by pedestrian amenities and public spaces shall be landscaped including one canopy tree to be planted every 30 feet of frontage of the property.
2. A side or rear landscaped area at least six feet wide must be provided along any side or rear lot line abutting a lot in Downtown Neighborhood (DN) district and must include the following features over the span of 50 linear feet:
 - (a) Two understory or evergreen trees.
 - (b) Three medium shrubs and three small shrubs or a fence or wall at least six feet in height.

H. Parking standards.

1. For development on any through lot fronting Main Street, parking access must be provided from the non-Main-Street frontage.

Table 3. DMS Dimensional Standards

Lot

Lot width	30 feet minimum
Lot coverage	100% maximum
Facade buildout (minimum)	—
Primary frontage	80% minimum
Secondary frontage	40% minimum

Setbacks - Principal Buildings

A - Primary front setback	0 foot minimum 15 feet maximum
B - Secondary front setback	0 foot minimum 15 feet maximum
C - Side setback	0 foot minimum
D - Rear setback	0 foot minimum

Building Form

E - Building width	180 feet maximum
F - Number of stories	3.5 or 4 maximum ¹
G - Ground story height	—
Commercial	14 feet minimum
Residential	10 feet minimum
H - Upper story height	10 feet minimum

Building Features

Ground story fenestration	—
Primary frontage	60% minimum
Secondary frontage	15% minimum
Upper story fenestration	15% minimum
Blank wall	20 feet maximum
Commercial space depth	20 feet minimum

¹ See § 240-24.1.6C6 (fourth third and one half story step-back).

§ 240-24.1.7. Downtown Village District (DV).

A. Intent.

1. The Downtown Village District is intended to promote mixed land uses that support the downtown core and reestablish or preserve traditional neighborhood forms and pedestrian orientation. Development is characterized by mid-rise (two- to three and one half~~four~~-story) single-use buildings and detached and semi-detached residential buildings.

B. Lot standards.

1. Newly platted lots must be dimensioned as specified by Table 4.
2. Lot coverage may not exceed the maximum specified by Table 4.
3. Building facades must have a minimum width that is equal to a percentage of a lot's width and is specified as the facade buildout on Table 4.
 - (a) Facade buildout is calculated by dividing the total width of all facades at or forward of the maximum front setback by the lot width and may be cumulatively calculated by multiple buildings.
 - (b) The open space of a forecourt is considered part of the building for the purpose of measuring building width and facade buildout.
 - (c) The SPGA may provide relief from the facade buildout requirements; the Board must find the issuance of the special permit is consistent with the design and infrastructure plan.

Facade Build Out

Single Building per Lot = $A \div B$

Multiple Buildings per Lot = $(A + A) \div B$

C. Building standards.

1. Multiple principal buildings are permitted per lot.
2. Principal buildings are permitted as specified by Table 4.

Hyannis, MA 02601

23 DEC 25 AM 9:56
BARNSTABLE TOWN CLERK

RE: **Report of the Barnstable Planning Board to Town Council on Item No. 2026-005, a Proposal to Amend the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning, Article III District Regulations, by modifying building height requirements in the Downtown Main Street and Downtown Village District**

Dear President Tamash,

The Planning Board held duly posted and noticed public hearings on September 22, 2025, October 27, 2025, November 24, 2025, and December 8, 2025 on the proposal to amend the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning, Article III District Regulations, by modifying building height requirements in the Downtown Main Street (DMS) and Downtown Village (DV) Districts.

At the close of the public hearing, a motion was duly made and seconded to **NOT** recommend to Town Council adoption of the proposed zoning amendment, Item No. 2026-005 as written. The vote approving that motion was unanimous, 7-0 with all members present.

The Planning Board agreed with the concept of lowering building height limits. However, it became clear to the Board that the proposed amendment did not effectively accomplish this intent. Specifically, after careful review, research and discussion, the Board found that solely reducing the number of stories may not necessarily lead to lower building heights. Instead, the Board elected to focus specifically on a recommendation to set a total building height limit for each downtown Hyannis zoning district, in addition to a maximum story limit.

Furthermore, it was recommended that the definition for "building height" found within the downtown Hyannis zoning districts be revised. The Board's discussions revealed that building height for the downtown area has historically been measured from the ground level to the top plate. The board expressed concern with this method, as the Board felt that this did not provide the public with a predictable result related to overall building height.

Instead, the Board recommended that the zoning ordinance specify that building height for downtown Hyannis zoning districts will be measured from the average mean grade to the top of the building ridge – representing a measurement of the entire building, rather than only a portion of the building. This change will result in reduced overall building heights as roof systems would be included in building height calculations.

In terms of establishing an appropriate height limit for DMS and DV, 56 feet was used as a starting point for the discussion. The Planning Board came to that starting point by simply adding typical story heights for four stories as well as a gable roof system. They also evaluated multiple building

367 Main Street, Hyannis, MA 02601

heights on Main Street including the new development located at 201 Main Street which will be a four-story building measured at 55.5 feet.

Given the recommended reduction in maximum stories from 4 to 3.5, the board felt it would be appropriate to reduce the maximum height by the corresponding amount. Since the minimum commercial story height in these districts is 14 feet, the board agreed that an appropriate reduction in height would be seven feet (equivalent to a half-story height). As such the Planning Board settled on a recommended maximum height of 49 feet (56 feet minus 7 feet) for the DMS and DV districts.

Although the topic was not originally included in the proposed amendment, the Board also examined building height limits for the Downtown Neighborhood (DN) District. To maintain consistency with the other downtown Hyannis districts, it was recommended to establish a maximum height of 42 feet for this district. As maximum stories for the DN is three, this recommended height limit was determined by subtracting the height of a commercial story (14 feet) from the starting point for discussion (56 feet). It was noted that all other downtown Hyannis zoning districts have previously established building height limitations.

Once an overall building height has been established, the Board then recommends removing limitations to the minimum and maximum stories to simplify the requirement and allow the building code to control floor heights as it does through Town.

Attached to this letter please find the Planning Board's recommended amendments in the form of redlined edits to the town's existing zoning ordinance, as well as sample building heights and a detailed diagram of building heights reviewed during the hearing.

Respectfully Submitted,

12-23-2015

Stephen Robichaud, Planning Board Chair

cc: James Kupfer, Director, Planning & Development
Ann Quirk, Town Clerk

§ 240 24.1.5. Standards for all Districts.

A. Building standards.

1. Frontage types.
 - (a) Buildings must have at least one frontage type except if otherwise specified. Buildings on corner lots must have two frontage types, one for each frontage.
 - (b) Frontage types are permitted as specified by Table 11.¹
 - (c) Multiple frontage types may exist for buildings that have more than one principal entrance.
2. Buildings must have at least one principal entrance located on the facade.
 - (a) Multistory buildings with ground floor commercial space(s) must have one principal entrance for each commercial space in addition to any principal entrance(s) necessary for any upper stories.
3. Buildings may not exceed the maximum number of stories as specified for each district.
 - (a) Each individual story of a building must comply with the minimum and maximum story height specified for each district.
 - (b) Story height is measured vertically from the surface of the finished floor to the surface of the finished floor above. When there is no floor above, story height is measured from the surface of the finished floor to the top of the structural beam or joists above or the top of the wall plate, whichever is more.
 - (c) The ground story is always counted as one story, except that a single ground story over 18 feet in height is counted as two stories.
 - (d) Each upper story is counted as one additional story, except that any upper story over 16 feet is counted as two stories.
 - (e) Basements are not counted as one story unless the finished floor of the ground story is five feet or more above the average ground level of the lot.
 - (f) Habitable space located directly under a pitched roof is counted as a 0.5 story.
 - (i) The roof rafters of a half story must intersect the wall plate or top of wall frame of the exterior walls at a height no more than two feet above the finished floor of the half story.
 - (g) Non-habitable attic space located under a pitched roof is not counted a half story.
 - (h) Pitched roofs with a slope greater than 12:12 require a special permit.

Figure 1. Building Height

-
4. Buildings may not exceed the maximum building height specified for each district, as applicable.

1. Editor's Note: See § 240-24.1.13, Tables.

- (a) ~~Building height is measured as the vertical distance from the average finished ground level to the top of the structural beam or joists of the uppermost story. For the purposes of this section Building height shall be defined as follows: The vertical distance between the elevations of the natural mean grade and the highest point of the roof. The natural mean grade is calculated by taking the average of the existing grade at the proposed building footprint corners.~~
5. Nonhabitable architectural features including, but not limited to, mechanical and stairwell penthouses; vents or exhausts; solar panels or skylights; belfries, chimneys, cupolas, parapets, spires, and steeples are not included in any building height or story calculations and are permitted on roofs.
 6. Building components are permitted as specified by Table 12.²
 7. Facades must have fenestration as specified for each district, as applicable.
 - (a) Fenestration is calculated as a percentage of the area of a facade.
 - (b) For buildings with ground story commercial spaces, ground story fenestration is measured between two feet and 12 feet above the finished floor of the ground story.
 - (c) For all other buildings and all other building stories, fenestration is measured independently for each story, corresponding with the top of a finished floor to the top of the finished floor above.
 8. Fenestration enclosed with glass may be included in the calculation if it meets the following criteria:
 - (a) For ground story fenestration, glazing must have a minimum 60% Visible Light Transmittance (VLT) and no more than 15% Visible Light Reflectance (VLR) as indicated by the manufacturer.
 - (b) For upper story fenestration, glazing must have a minimum of 40% VLT and no more than 15% VLR as indicated by the manufacturer.
- B. Use provisions.
1. General.
 - (a) The use of real property is permitted as specified by Table 1.
 - (i) Table 1 is organized by broad use categories and specific uses that may be regulated differently than other uses from the same category.
 - (ii) Use categories are intended to include uses with similar functional, product, or physical characteristics; the type and amount of activity; the manner of tenancy; the conduct of customers; how goods or services are sold or delivered; and the likely impacts on surrounding properties.
 - (iii) Where Table 1 identifies a category followed by "except as follows" any use that meets the definition of that use category is permitted by right, while the specific uses identified in the list under that category are either not permitted, are permitted with limitations, or require a special permit despite belonging to the same use category

- (iv) Where Table 1 identifies a category followed by "as specified below" the specific uses listed under the category are the only land uses permitted from that use category.
- (b) The Building Commissioner shall classify the actual use of land or structures using the defined use categories specified on Table 1. Also see § 240-24.1.4, Definitions.
 - (i) Real property may have one or more principal use(s).
 - (ii) Once classified into a use category, the use of land or structures in the same manner cannot also be classified into another use category.
 - (iii) The use of land or structures in a manner that is inconsistent with a permitted use category or specific use type specified on Table 1 is prohibited.
 - (iv) Unless classified as a specific use that is not permitted in a zoning district, an existing nonconforming use may be changed to another nonconforming use that is from the same use category as the existing nonconforming use by special permit.
 - (v) A nonconforming use may not change to a different nonconforming use that is from a different use category than the existing nonconforming use.
- (c) Accessory uses are permitted as set forth in Article V of the Barnstable Zoning Ordinance.

C. Parking standards.

1. Applicability.

- (a) Parking is required based on the intended use of floor area within a building at construction permitting and not for the subsequent establishment, change, or expansion of any permitted use; or the renovation of any existing principal building.

2. General.

- (a) Accessory parking must be provided as specified by Table 2 and is calculated as the sum of all required spaces, including any adjustment specified for on-site shared parking.

- (i) Commercial parking uses are exempt from Table 2.

- (b) Relief from the parking requirements of Table 2 requires a special permit.

- (c) In its discretion to approve or deny a special permit authorizing relief from the minimum parking requirements of Table 2, the Planning Board shall consider conditioning the special permit upon one or more of the following:

- (i) Elimination or reduction of existing curb cuts and driveway aprons.

- (ii) Establishment of a shared driveway or cross-access connection between abutting parking lots with a binding easement and joint maintenance agreement defining the responsibilities of abutting property owners sharing access.

3. Location.

- (a) Accessory parking spaces must be located on the same lot as the building they support and may be provided within a principal building or outbuilding or as surface parking.
- (b) Motor vehicle parking of any type is prohibited within the frontage area of a lot and any required landscape buffer.
 - (i) Real property in the Highway Commercial (HC) district or in the Downtown Hospital (DH) district is exempt.

Use Category	DMS	DV	DN	DH	HH	TC	HC	On Site Shared Parking Adjustment ¹

D. Site standards.

1. Forecourts.

(a) Driveways and passenger drop-offs are permitted in forecourts by special permit.

(i) Real property in the Downtown Hospital (DH) district is exempt.

(b) Garage entrances, parking spaces, loading and service areas, exhaust vents, mechanical equipment, and refuse or recycling storage are not permitted in forecourts.

2. Landscaping.

(a) Lot area uncovered by structures or impermeable surfaces must be landscaped.

(b) New canopy trees must be at least 14 feet in height or three inches in caliper when planted.

(c) New understory trees must be at least 10 feet in height or 1.5 inches in caliper when planted.

- (d) New evergreen trees must be at least six feet in height when planted.
- (e) Vegetation must be low-water-use and low-maintenance plant species that are indigenous to Cape Cod. Plant species should be capable of withstanding seasonably wet conditions and provide habitat value for wildlife.
- (f) Landscaped areas must be maintained, irrigated, and fertilized. Vegetation should be organically maintained to every extent practicable.
- (g) Vegetation may not obscure any driveways, vehicular entrances, or roadway intersections.
- (h) Mulch may not be placed in a manner that will wash into catch basins or drainage pipes.
- (i) All site plan and special permit applications for development or modifications that meet or exceed the thresholds established in § 240-24.1.3B2(b)(i) must submit a landscape plan(s) signed and stamped by a MA registered landscape architect.
- (j) The Building Commissioner shall not issue a certificate of occupancy until the landscaping has been installed in accordance with the approved plans unless the property owner posts security to the Town of Barnstable for 150% of the estimated cost of installation of the landscaping.
- (k) All development and/or modifications that meet or exceed the thresholds established in § 240-24.1.3B2(b)(i) shall provide financial security for 150% of the estimated cost of plant installation for the duration of three years after planting has been installed and must be provided prior to issuance of any certificate of occupancy in a form acceptable to the Town Attorney's Office. The cost estimate shall be prepared by a qualified professional and submitted to the Director of Planning and Development for approval. Upon completion of planting, the applicant must request an inspection. The three-year maintenance period commences upon approved inspection. Partial release of the security may be authorized after approved inspection, not to exceed 50%. The full security shall be returned to the applicant or their successors after three years upon final inspection by the Director of Planning & Development. The Town reserves the right upon noncompliance with this section to pursue all available legal and equitable remedies to compel compliance.
 - (l) Any fractional value required for plant materials is rounded up to the next whole number.

3. Stormwater management.

- (a) Rain gardens should be used to the maximum extent practicable. Rain gardens are defined as landscaped areas designed to absorb and filter stormwater runoff from impervious surfaces.

4. Signs.

- (a) All development shall comply with the applicable signage requirements contained

in Article VII, Sign Regulations, at §§ 240-59 through 240-89, inclusive, of the Barnstable Zoning Ordinance. Internally illuminated signs are prohibited in the Downtown Hyannis Zoning Districts.

5. Outdoor lighting.

- (a) All outdoor lighting must be directed only on site.
 - (i) The trespass of light at any lot line may not exceed 0.1 footcandle, except that the trespass of light at any lot line abutting a lot in Downtown Neighborhood (DN) district may not exceed 0.05 footcandle.
 - (ii) At driveways, lighting may be up to 0.5 footcandle at the front lot line.
 - (iii) Outdoor lighting may not cause glare that impacts motorists, pedestrians, or neighboring premises.
- (b) Light fixtures must have a total cutoff of all light at less than 90° and a beam cutoff of less than 75°. Attached building or wall pack lighting should be screened by the building's architectural features or contain a 45° cutoff shield.
- (c) Electrical service for lighting on posts or poles must be located underground.

6. Fences.

- (a) Fences greater than four feet in height in the frontage area and seven feet in height in all other locations at any point along their length require a special permit except that where fencing that is higher than seven feet is needed to screen mechanical equipment, the Building Commissioner may allow a greater height as determined through the site plan review process.
- (b) Fences may be no more than 50% open.
- (c) Fence posts and supporting rails must face inward toward the property being fenced and the finished face must be oriented towards the abutting lot.

7. Vehicular access.

- (a) Driveways, vehicular entrances to parking lots or structures and curb cuts must comply with the minimum or maximum width specified for each district.
- (b) Drive-throughs require a special permit and are only permitted for the following uses:
 - (i) Banks (a specific use of the commercial service use category).
 - (ii) Pharmacies (a specific use of the retail sales use category).
- (c) All new curb cuts require a special permit.
- (d) The interior width of a curb cut (between the curb stones or flares) may be no wider than the driveway, vehicular entrance, or loading facility it serves, unless a greater width is determined to be appropriate by the Building Commissioner during the Site Plan Review process based upon unique operational requirements of the proposed use.

- (e) A driveway apron may be installed within a sidewalk of an improved way, but the grade, cross slope, and clear width of the pedestrian walkway must be maintained between the driveway apron and the abutting driveway.
- (f) The appearance of the pedestrian walkway (i.e., scoring pattern or paving material) must indicate that, although a vehicle may cross to enter a property, the area traversed by a vehicle remains part of the sidewalk.

8. Utilities.

- (a) All mechanical equipment must be screened from view from adjacent lots and public rights-of-way and integrated into or compatible with the architectural design of the building.

E. Surface parking lot design standards.

1. Applicability.

- (a) This section is applicable to the construction of any new surface parking lot and the expansion or modification of an existing surface parking lot containing 21 or more parking spaces that increases the number of parking spaces by five or more.

2. General.

- (a) To reduce traffic congestion and increase convenience for customers, employees, and residents, development is encouraged to provide direct vehicular connections between abutting parking lots so that motor vehicles can move between properties without re-entering the public street.
- (b) To increase walkability and reduce conflicts between pedestrians and motor vehicles, development is encouraged to provide access to rear parking lots via driveways that are shared between abutting properties or multiple properties on the same block face.

3. Surface parking lot landscaping.

- (a) One three-inch minimum caliper low-water-use, low-maintenance tree must be provided for every five parking spaces and must be located within 10 feet of the parking lot. Trees shall be maintained and irrigated as necessary and planted within at least 50 square feet of permeable area. Existing trees located in the interior of parking lots are credited toward this requirement.
- (b) A front landscaped buffer at least 10 feet wide must be provided between any parking lot and any lot line abutting an improved way and must include the following features over the span of 50 linear feet:
 - (i) One canopy tree.
 - (ii) One understory or evergreen tree.
 - (iii) Five medium shrubs and five small shrubs or a fence or wall a maximum of four feet in height.
- (a) A side/rear landscaped buffer at least six feet wide must be provided between any side or rear lot line and any parking lot with five or more parking spaces, excluding any vehicular connections to abutting parking lots and must include the following features over the span of 50 linear feet:

- (iv) Two understory or evergreen trees.
 - (v) Three large shrubs and five small shrubs or a fence or wall at least six feet in height.
- (c) A landscaped buffer at least 10 feet wide must be provided between any building and any parking lot with 10 or more parking spaces, excluding building entrances, service and loading areas, and utility locations, and must include the following features over the span of 50 linear feet:
- (i) Two understory or evergreen trees.
 - (ii) Four medium shrubs.
 - (iii) Six small shrubs.
- (d) At least 10% of any parking lot with 10 or more parking spaces must be landscaped. Lot area required as a landscape buffer is excluded from the calculation of the parking lot area.
- (e) Landscape islands abutting a single row of parking spaces must be at least six feet in width and the same length as the parking spaces. Each island must include one three-inch minimum caliper, low-water-use, low-maintenance tree.
- (f) Landscape islands abutting a double row of parking spaces must be at least eight feet in width and the same length as the parking spaces. Each island must include two three-inch minimum caliper, low-water-use, low-maintenance trees.

§ 240-24.1.6. Downtown Main Street District (DMS).

A. Intent.

1. The Downtown Main Street District is intended to promote the continuation of a walkable, pedestrian-oriented downtown environment with continuous active streetscape. Development is characterized by mid-rise (two- to four-story) mixed-use buildings, continuous street walls and variety of materials with parking visually minimized. Land uses are mixed residential and active commercial, including retail, restaurant, office, hospitality, cultural and institutional.

B. Lot standards.

1. Newly platted lots must be dimensioned as specified by Table 3.
2. Building facades must have a minimum width that is equal to a percentage of a lot's width and is specified as the facade buildout by Table 3.
 - (a) Facade buildout is calculated by dividing the total width of all facades by the lot width and may be cumulatively calculated by multiple buildings.
 - (b) The open space of a forecourt is considered part of the building for the purpose of measuring building width and facade buildout.
 - (c) The SPGA may provide relief from the facade buildout requirements; the Board must find the issuance of the special permit is consistent with the design and infrastructure plan.

Facade Build Out

Single Building per Lot = $A \div B$

Multiple Buildings per Lot = $(A + A) \div B$

C. Building standards.

1. Multiple principal buildings are permitted per lot.
2. Principal buildings are permitted as specified by Table 3.
 - (a) Additional principal buildings are exempt from the required maximum front setback.

3. Principal building facade(s) must be built parallel to any primary front lot line, at or between the minimum and maximum front setbacks.
4. Any building contributing toward the frontage buildout for any lot fronting Main Street between Ocean Street and Sea Street must provide ground story commercial space that is at least 20 feet in depth for 100% of the total width of the building, excluding lobby entrances and other means of egress associated with the use of upper stories.
5. Awnings, canopies, signs, balconies, and nonhabitable architectural features of a building may project over the public sidewalk but must provide at least eight feet of clearance and a license from the Town Manager in accordance with Barnstable General Ordinances, Part 1, Chapter 121, § 121-6J is required.
- ~~6. The fourth story of any building must be recessed ("stepped back") from the facade of the stories below at least eight feet.~~

- 7.6. Mechanical and stairwell penthouses and building systems equipment must be setback from any exterior wall a distance that is equal to their height.
- 8.7. Facades may not have any blank wall areas without fenestration or architectural surface relief greater than 20 feet measured both vertically and horizontally for all stories of a building for any facade.
- 9.8. Loading and service areas may not be visible from any public sidewalk of Main Street.

D. Design guidelines.

1. The development of any new principal building should include a pedestrian passage connecting the sidewalk at the front of the property to any parking areas to the rear of the building, to every extent practicable, where no such pedestrian passage exists within 200 linear feet of the building's principal entrance.

2. When provided, pedestrian passages may be designed as an open-air passage between buildings, a covered atrium providing continuous protection from the elements, or as an up to two-story passage through a building.

E. Use provisions.

1. Limitations.

- (a) Occupation of a single commercial space greater than 5,000 square feet by any food and beverage service or retail sales use requires a special permit.
- (b) The maximum number of dwelling units permitted for any multiunit dwelling residential use is determined by the permitted dimensions of the building and the actual motor vehicle parking spaces provided on a lot as required by Table 2.

F. Site standards.

1. Driveways, vehicular entrances to parking lots or structures, and curb cuts may be no wider than 24 feet.

G. Landscape standards.

1. A front landscape area is not required if the front setback is zero. When a setback is greater than zero, those portions of the setback not occupied by pedestrian amenities and public spaces shall be landscaped including one canopy tree to be planted every 30 feet of frontage of the property.
2. A side or rear landscaped area at least six feet wide must be provided along any side or rear lot line abutting a lot in Downtown Neighborhood (DN) district and must include the following features over the span of 50 linear feet:
 - (a) Two understory or evergreen trees.
 - (b) Three medium shrubs and three small shrubs or a fence or wall at least six feet in height.

H. Parking standards.

1. For development on any through lot fronting Main Street, parking access must be provided from the non-Main-Street frontage.

Table 3. DMS Dimensional Standards

Lot		Building Form	
Lot width	30 feet minimum	E-G - Building width	180 feet maximum
Lot coverage	100% maximum	F - Number of stories	3.5 or 4 maximum ¹

B - Secondary front setback	0 foot minimum 15 feet maximum	Ground story fenestration	—
C - Side setback	0 foot minimum	Primary frontage	60% minimum
D - Rear setback	0 foot minimum	Secondary frontage	15% minimum
Building Height	<u>3.5 maximum</u>	Upper story fenestration	15% minimum
E - Number of Stories		Blank wall	20 feet maximum
F - Building Height	<u>49 feet maximum</u>	Commercial space depth	20 feet minimum

¹ See § 240-24.1.6C6 (fourth story step back).

§ 240-24.1.7. Downtown Village District (DV).

A. Intent.

1. The Downtown Village District is intended to promote mixed land uses that support the downtown core and reestablish or preserve traditional neighborhood forms and pedestrian orientation. Development is characterized by mid-rise (two- to four-story) single-use buildings and detached and semi-detached residential buildings.

B. Lot standards.

1. Newly platted lots must be dimensioned as specified by Table 4.
2. Lot coverage may not exceed the maximum specified by Table 4.
3. Building facades must have a minimum width that is equal to a percentage of a lot's width and is specified as the facade buildout on Table 4.
 - (a) Facade buildout is calculated by dividing the total width of all facades at or forward of the maximum front setback by the lot width and may be cumulatively calculated by multiple buildings.
 - (b) The open space of a forecourt is considered part of the building for the purpose of measuring building width and facade buildout.
 - (c) The SPGA may provide relief from the facade buildout requirements; the Board must find the issuance of the special permit is consistent with the design and infrastructure plan.

Facade Build Out

Single Building per Lot = $A \div B$

Multiple Buildings per Lot = $(A + A) \div B$

C. Building standards.

1. Multiple principal buildings are permitted per lot.
2. Principal buildings are permitted as specified by Table 4.
 - (a) Additional principal buildings are exempt from the required maximum front setback.
3. Principal building facade(s) must be built parallel to any primary front lot line, at or between the minimum and maximum front setbacks.

4. ~~The fourth story of any building must be recessed ("stepped back") from the facade of the stories below at least eight feet.~~

5.4. Mechanical and stairwell penthouses and building systems equipment must be set back from any exterior wall a distance that is equal to their height.

D. Use provisions.

1. Limitations.

(a) Occupation of a single commercial space greater than 5,000 square feet by any food and beverage service or retail sales use requires a special permit.

(b) The maximum number of dwelling units permitted for any multiunit dwelling residential use is determined by the permitted dimensions of the building and the actual motor vehicle parking spaces provided on a lot as required by Table 2.¹

E. Site standards.

1. Driveways, vehicular entrances to parking lots or structures, and curb cuts may be no wider than 24 feet.

F. Landscape standards.

1. A front landscape area is not required if the front setback is zero. When a setback is greater than zero, those portions of the setback not occupied by pedestrian amenities and public spaces shall be landscaped including one canopy tree to be planted every 30 feet of frontage of the property.

Table 4. DV Dimensional Standards

<u>E – Number of stories</u>			
<u>F – Building height</u>	<u>49 feet maximum</u>	Blank wall	20 feet maximum
		Commercial space depth	20 feet minimum

See § 240-24.1.7C4 (fourth story step-back).

§ 240-24.1.8. Downtown Neighborhood District (DN).

A. Intent.

1. The Downtown Neighborhood District is intended to promote the traditional uses and form of the neighborhoods adjacent to downtown that are characterized by a variety of 19th and 20th century detached and semi-detached residential building types.

B. Lot standards.

1. Newly platted lots must be dimensioned as specified by Table 5.
2. Lot coverage may not exceed the maximum specified by Table 5.

C. Building standards.

1. One principal building and multiple outbuildings are permitted per lot.
2. Principal buildings and outbuildings are permitted as specified by Table 5.
 - (a) The third story in a single-family or two-family dwelling can only occur within habitable attic space.

D. Use provisions.

1. Limitations.
 - (a) Office and Health Care Clinic uses are permitted only for lots fronting South Street, School Street, or High School Road.
 - (b) Two-unit dwellings are prohibited for lots fronting only Brookshire Road or King's Way.
 - (c) Multiunit dwellings are permitted in the DN District with a maximum of four dwelling units permitted in any one building per lot. In addition, one accessory dwelling unit may be permitted per lot. Multiunit dwellings shall be prohibited for lots fronting on only Brookshire Road or King's Way.

E. Site development.

1. Development on corner lots must comply with the provisions of § 240-41 of the Barnstable Zoning Ordinance.
2. Curb cuts may be no wider than 12 feet.
3. Outdoor lighting must be shielded and provide total cutoff of all light at the boundaries of the lot under development.
4. Fences greater than four feet in height in the frontage area and seven feet in height in all other locations at any point along their length require a special permit.

F. Landscape standards.

- 1.A perimeter green space of not less than 10 feet in width shall be provided, such space

§ 240-24.1.8§ 240-24.1.8

to be planted and maintained as green area and to be broken only in a front yard by a driveway.

ITEM# 2026-006

INTRO: 07/17/2025, 08/21/2025, 01/29/2026, 02/12/2026, 03/12/2026

**2026-006 AMENDING THE CODE OF THE TOWN OF BARNSTABLE, PART I
GENERAL ORDINANCES, CHAPTER 240 ZONING TO REPEAL THE
DOWNTOWN VILLAGE DISTRICT AND AMEND THE ZONING MAP TO
REPLACE THE DOWNTOWN VILLAGE DISTRICT WITH THE DOWNTOWN
NEIGHBORHOOD ZONING DISTRICT**

ORDERED: That the Code of the Town of Barnstable, Part I, General Ordinances, Chapter 240 Zoning be amended as follows:

SECTION 1

By amending the Zoning Map of Barnstable, Mass. Dated September 1, 1998, as previously amended, as referenced in Article II, Section 240-6, to repeal the “Downtown Village District” and replace it with the “Downtown Neighborhood District”, as shown on the draft map dated 4-1-25, prepared by the Town of Barnstable Geographical Information System Unit, and entitled “Downtown Hyannis Zoning District”.

SECTION 2

By amending Article II, Section 240-5, Establishment of districts, by deleting the “DV Downtown Village” district where it appears under the heading “Downtown Hyannis Zoning District”.

SECTION 3

By amending Article III, Section 240-24.1.5 by deleting in subsection B, Table 1, the “DV” column in its entirety.

SECTION 4

By further amending Section 240-24.1.5. by deleting in subsection C, Table 2, the “DV” column in its entirety.

SECTION 5

By amending Article III by deleting Section 240-24.1.7 Downtown Village District (DV) in its entirety and inserting “Section 240-24.1.7 Reserved” in its place.

SECTION 6

By amending Article III, Section 240-24.1.13 Tables by deleting the “DV” column in its entirety.

SPONSOR: Craig A. Tamash, Town Council President, Precinct 4

INTRO: 07/17/2025, 08/21/2025, 01/29/2026, 02/12/2026, 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark S. Ells, Town Manager
THROUGH: James Kupfer, Director, Planning & Development Department
DATE: June 30, 2025
SUBJECT: Amending the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning to delete the Downtown Village District and to amend the zoning map to expand the Downtown Neighborhood Zoning District in all locations Downtown Village District exists and to delete the Downtown Village District

BACKGROUND: These proposed zoning amendments follow discussions by the Town Council Ad-Hoc Subcommittee regarding necessary updates to Chapter 240 Zoning Ordinance. The Committee has recommended revising the outer extents of the Downtown Hyannis Zoning Districts to limit density, heights, lot coverage and increase setbacks. The subcommittee determined that Downtown Neighborhood District better aligns with surrounding neighborhoods. The amendments eliminate the Downtown Village District and expand the Downtown Neighborhood District.

Zoning amendments are processed in accordance with Massachusetts General Law (MGL) Chapter 40A, Section 5. Adoption or change of zoning ordinances may be initiated by the submission to the Town Council of a proposed zoning ordinance by different parties, including the Town Council itself.

ANALYSIS: The proposed changes will reduce maximum allowable building heights, limit overall density, limit lot coverage and increase setbacks to seek more compatible development with existing structures and neighborhood character. The proposed amended zoning district boundaries may be necessary to reflect appropriate height and density transitions.

FISCAL IMPACT: There is no significant fiscal impact associated with this item.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, supports this item.

STAFF SUPPORT: James Kupfer, Director, Planning & Development Department

§ 240-5. Establishment of districts. [Amended 7-15-1999; 10-26-2000; 2-1-2001;11-18-2004 by Order No. 2004-113; 1-20-2005 by Order No. 2005-038; 1-20-2005 by Order No. 2005-039; 7-14-2005 by Order No. 2005-100; 5-10-2007 by Order No. 2007-101; 2-28-2008 by Order No. 2008-077; 2-28-2008 by Order No. 2008-090; 4-3-2008 by Order No. 2008-091; 6-17-2010 by Order No. 2010-122; 10-7-2010 by Order No. 2010-159; 9-8-2011 by Order No. 2011-138; 2-6-2014 by Order No. 2014-050; 4-27-2017 by Order No. 2017-100; 10-21-2021 by Order No. 2022-007; 2-2-2023 by Order No. 2022-1442-2-2023 by Order No. 2022-146]

§ 240-24.1.5. Standards for all Districts.

A. Building standards.

1. Frontage types.

- (a) Buildings must have at least one frontage type except if otherwise specified. Buildings on corner lots must have two frontage types, one for each frontage.
- (b) Frontage types are permitted as specified by Table 11.¹
- (c) Multiple frontage types may exist for buildings that have more than one principal entrance.

2. Buildings must have at least one principal entrance located on the facade.

- (a) Multistory buildings with ground floor commercial space(s) must have one principal entrance for each commercial space in addition to any principal entrance(s) necessary for any upper stories.

3. Buildings may not exceed the maximum number of stories as specified for each district.

- (a) Each individual story of a building must comply with the minimum and maximum story height specified for each district.
- (b) Story height is measured vertically from the surface of the finished floor to the surface of the finished floor above. When there is no floor above, story height is measured from the surface of the finished floor to the top of the structural beam or joists above or the top of the wall plate, whichever is more.
- (c) The ground story is always counted as one story, except that a single ground story over 18 feet in height is counted as two stories.
- (d) Each upper story is counted as one additional story, except that any upper story over 16 feet is counted as two stories.
- (e) Basements are not counted as one story unless the finished floor of the ground story is five feet or more above the average ground level of the lot.
- (f) Habitable space located directly under a pitched roof is counted as a 0.5 story.
 - (i) The roof rafters of a half story must intersect the wall plate or top of wall frame of the exterior walls at a height no more than two feet above the finished floor of the half story.
- (g) Nonhabitable attic space located under a pitched roof is not counted a half story.
- (h) Pitched roofs with a slope greater than 12:12 require a special permit.

4. Buildings may not exceed the maximum building height specified for each district, as applicable.

1. Editor's Note: See § 240-24.1.13, Tables.

- (a) Building height is measured as the vertical distance from the average finished ground level to the top of the structural beam or joists of the uppermost story.
 - 5. Non-habitable architectural features including, but not limited to, mechanical and stairwell penthouses; vents or exhausts; solar panels or skylights; belfries, chimneys, cupolas, parapets, spires, and steeples are not included in any building height or story calculations and are permitted on roofs.
 - 6. Building components are permitted as specified by Table 12.²
 - 7. Facades must have fenestration as specified for each district, as applicable.
 - (a) Fenestration is calculated as a percentage of the area of a façade.
 - (b) For buildings with ground story commercial spaces, ground story fenestration is measured between two feet and 12 feet above the finished floor of the ground story.
 - (c) For all other buildings and all other building stories, fenestration is measured independently for each story, corresponding with the top of a finished floor to the top of the finished floor above.
 - 8. Fenestration enclosed with glass may be included in the calculation if it meets the following criteria:
 - (a) For ground story fenestration, glazing must have a minimum 60% Visible Light Transmittance (VLT) and no more than 15% Visible Light Reflectance (VLR) as indicated by the manufacturer.
 - (b) For upper story fenestration, glazing must have a minimum of 40% VLT and no more than 15% VLR as indicated by the manufacturer.
- B. Use provisions.
- 1. General.
 - (a) The use of real property is permitted as specified by Table 1.
 - (i) Table 1 is organized by broad use categories and specific uses that may be regulated differently than other uses from the same category.
 - (ii) Use categories are intended to include uses with similar functional, product, or physical characteristics; the type and amount of activity; the manner of tenancy; the conduct of customers; how goods or services are sold or delivered; and the likely impacts on surrounding properties.
 - (iii) Where Table 1 identifies a category followed by "except as follows" any use that meets the definition of that use category is permitted by right, while the specific uses identified in the list under that category are either not permitted, are permitted with limitations, or require a special permit despite belonging to the same use category.

2. Editor's Note: See § 240-24.1.13, Tables.

- (iv) Where Table 1 identifies a category followed by "as specified below" the specific uses listed under the category are the only land uses permitted from that use category.
- (b) The Building Commissioner shall classify the actual use of land or structures using the defined use categories specified on Table 1. Also see § 240-24.1.4, Definitions.
 - (i) Real property may have one or more principal use(s).
 - (ii) Once classified into a use category, the use of land or structures in the same manner cannot also be classified into another use category.
 - (iii) The use of land or structures in a manner that is inconsistent with a permitted use category or specific use type specified on Table 1 is prohibited.
 - (iv) Unless classified as a specific use that is not permitted in a zoning district, an existing nonconforming use may be changed to another nonconforming use that is from the same use category as the existing nonconforming use by special permit.
 - (v) A nonconforming use may not change to a different nonconforming use that is from a different use category than the existing nonconforming use.
- (c) Accessory uses are permitted as set forth in Article V of the Barnstable Zoning Ordinance.

C. Parking standards.

1. Applicability.

- (a) Parking is required based on the intended use of floor area within a building at construction permitting and not for the subsequent establishment, change, or expansion of any permitted use; or the renovation of any existing principal building.

2. General.

- (a) Accessory parking must be provided as specified by Table 2 and is calculated as the sum of all required spaces, including any adjustment specified for on-site shared parking.

- (i) Commercial parking uses are exempt from Table 2.
- (b) Relief from the parking requirements of Table 2 requires a special permit.
- (c) In its discretion to approve or deny a special permit authorizing relief from the minimum parking requirements of Table 2, the Planning Board shall consider conditioning the special permit upon one or more of the following:
 - (i) Elimination or reduction of existing curb cuts and driveway aprons.
 - (ii) Establishment of a shared driveway or cross-access connection between abutting parking lots with a binding easement and joint maintenance agreement defining the responsibilities of abutting property owners sharing access.

3. Location.

- (a) Accessory parking spaces must be located on the same lot as the building they support and may be provided within a principal building or outbuilding or as surface parking.
- (b) Motor vehicle parking of any type is prohibited within the frontage area of a lot and any required landscape buffer.
 - (i) Real property in the Highway Commercial (HC) district or in the Downtown Hospital (DH) district is exempt.

Table 2. Minimum Required Accessory Parking Spaces

Visitor accommodations (per room)	1.25	1.25	N/A	1.25	N/A	1.25	—

D. Site standards.

1. Forecourts.

- (a) Driveways and passenger drop-offs are permitted in forecourts by special permit.
 - (i) Real property in the Downtown Hospital (DH) district is exempt.
- (b) Garage entrances, parking spaces, loading and service areas, exhaust vents, mechanical equipment, and refuse or recycling storage are not permitted in forecourts.

2. Landscaping.

- (a) Lot area uncovered by structures or impermeable surfaces must be landscaped.
- (b) New canopy trees must be at least 14 feet in height or three inches in caliper when planted.
- (c) New understory trees must be at least 10 feet in height or 1.5 inches in caliper when planted.
- (d) New evergreen trees must be at least six feet in height when planted.
- (e) Vegetation must be low-water-use and low-maintenance plant species that are indigenous to Cape Cod. Plant species should be capable of withstanding seasonably wet conditions and provide habitat value for wildlife.
- (f) Landscaped areas must be maintained, irrigated, and fertilized. Vegetation should be organically maintained to every extent practicable.
- (g) Vegetation may not obscure any driveways, vehicular entrances, or roadway intersections.
- (h) Mulch may not be placed in a manner that will wash into catch basins or drainage pipes.
- (i) All site plan and special permit applications for development or modifications that meet or exceed the thresholds established in § 240-24.1.3B2(b)(i) must submit a landscape plan(s) signed and stamped by a MA registered landscape architect.
- (j) The Building Commissioner shall not issue a certificate of occupancy until the

landscaping has been installed in accordance with the approved plans unless the property owner posts security to the Town of Barnstable for 150% of the estimated cost of installation of the landscaping.

- (k) All development and/or modifications that meet or exceed the thresholds established in § 240-24.1.3B2(b)(i) shall provide financial security for 150% of the estimated cost of plant installation for the duration of three years after planting has been installed and must be provided prior to issuance of any certificate of occupancy in a form acceptable to the Town Attorney's Office. The cost estimate shall be prepared by a qualified professional and submitted to the Director of Planning and Development for approval. Upon completion of planting, the applicant must request an inspection. The three-year maintenance period commences upon approved inspection. Partial release of the security may be authorized after approved inspection, not to exceed 50%. The full security shall be returned to the applicant or their successors after three years upon final inspection by the Director of Planning & Development. The Town reserves the right upon noncompliance with this section to pursue all available legal and equitable remedies to compel compliance. (l) Any fractional value required for plant materials is rounded up to the next whole number.
- 3. Stormwater management.
 - (a) Rain gardens should be used to the maximum extent practicable. Rain gardens are defined as landscaped areas designed to absorb and filter stormwater runoff from impervious surfaces.
 - 4. Signs.
 - (a) All development shall comply with the applicable signage requirements contained in Article VII, Sign Regulations, at §§ 240-59 through 240-89, inclusive, of the Barnstable Zoning Ordinance. Internally illuminated signs are prohibited in the Downtown Hyannis Zoning Districts.
 - 5. Outdoor lighting.
 - (a) All outdoor lighting must be directed only on site.
 - (i) The trespass of light at any lot line may not exceed 0.1 footcandle, except that the trespass of light at any lot line abutting a lot in Downtown Neighborhood (DN) district may not exceed 0.05 footcandle.
 - (ii) At driveways, lighting may be up to 0.5 footcandle at the front lot line.
 - (iii) Outdoor lighting may not cause glare that impacts motorists, pedestrians, or neighboring premises.
 - (b) Light fixtures must have a total cutoff of all light at less than 90° and a beam cutoff of less than 75°. Attached building or wall pack lighting should be screened by the building's architectural features or contain a 45° cutoff shield.

- (c) Electrical service for lighting on posts or poles must be located underground.
- 6. Fences.
 - (a) Fences greater than four feet in height in the frontage area and seven feet in height in all other locations at any point along their length require a special permit except that where fencing that is higher than seven feet is needed to screen mechanical equipment, the Building Commissioner may allow a greater height as determined through the site plan review process.
 - (b) Fences may be no more than 50% open.
 - (c) Fence posts and supporting rails must face inward toward the property being fenced and the finished face must be oriented towards the abutting lot.
- 7. Vehicular access.
 - (a) Driveways, vehicular entrances to parking lots or structures and curb cuts must comply with the minimum or maximum width specified for each district.
 - (b) Drive-throughs require a special permit and are only permitted for the following uses:
 - (i) Banks (a specific use of the commercial service use category).
 - (ii) Pharmacies (a specific use of the retail sales use category).
 - (c) All new curb cuts require a special permit.
 - (d) The interior width of a curb cut (between the curb stones or flares) may be no wider than the driveway, vehicular entrance, or loading facility it serves, unless a greater width is determined to be appropriate by the Building Commissioner during the Site Plan Review process based upon unique operational requirements of the proposed use.
 - (e) A driveway apron may be installed within a sidewalk of an improved way, but the grade, cross slope, and clear width of the pedestrian walkway must be maintained between the driveway apron and the abutting driveway.
 - (f) The appearance of the pedestrian walkway (i.e., scoring pattern or paving material) must indicate that, although a vehicle may cross to enter a property, the area traversed by a vehicle remains part of the sidewalk.
- 8. Utilities.
 - (a) All mechanical equipment must be screened from view from adjacent lots and public rights-of-way and integrated into or compatible with the architectural design of the building.
- E. Surface parking lot design standards.
 - 1. Applicability.
 - (a) This section is applicable to the construction of any new surface parking lot and the expansion or modification of an existing surface parking lot containing 21 or more parking spaces that increases the number of parking spaces by five or more.

2. General.
 - (a) To reduce traffic congestion and increase convenience for customers, employees, and residents, development is encouraged to provide direct vehicular connections between abutting parking lots so that motor vehicles can move between properties without re-entering the public street.
 - (b) To increase walkability and reduce conflicts between pedestrians and motor vehicles, development is encouraged to provide access to rear parking lots via driveways that are shared between abutting properties or multiple properties on the same block face.
3. Surface parking lot landscaping.
 - (a) One three-inch minimum caliper low-water-use, low-maintenance tree must be provided for every five parking spaces and must be located within 10 feet of the parking lot. Trees shall be maintained and irrigated as necessary and planted within at least 50 square feet of permeable area. Existing trees located in the interior of parking lots are credited toward this requirement.
 - (b) A front landscaped buffer at least 10 feet wide must be provided between any parking lot and any lot line abutting an improved way and must include the following features over the span of 50 linear feet:
 - (i) One canopy tree.
 - (ii) One understory or evergreen tree.
 - (iii) Five medium shrubs and five small shrubs or a fence or wall a maximum of four feet in height.
 - (c) A side/rear landscaped buffer at least six feet wide must be provided between any side or rear lot line and any parking lot with five or more parking spaces, excluding any vehicular connections to abutting parking lots and must include the following features over the span of 50 linear feet:
 - (i) Two understory or evergreen trees.
 - (ii) Three large shrubs and five small shrubs or a fence or wall at least six feet in height.
 - (d) A landscaped buffer at least 10 feet wide must be provided between any building and any parking lot with 10 or more parking spaces, excluding building entrances, service and loading areas, and utility locations, and must include the following features over the span of 50 linear feet:
 - (i) Two understory or evergreen trees.

- (ii) Four medium shrubs.
- (iii) Six small shrubs.
- (e) At least 10% of any parking lot with 10 or more parking spaces must be landscaped. Lot area required as a landscape buffer is excluded from the calculation of the parking lot area.
- (f) Landscape islands abutting a single row of parking spaces must be at least six feet in width and the same length as the parking spaces. Each island must include one three-inch minimum caliper, low-water-use, low-maintenance tree.
- (g) Landscape islands abutting a double row of parking spaces must be at least eight feet in width and the same length as the parking spaces. Each island must include two three-inch minimum caliper, low-water-use, low-maintenance trees.

~~§ 240-24.1.7. Downtown Village District (DV)~~

~~A. Intent.~~

- ~~1. The Downtown Village District is intended to promote mixed land uses that support the downtown core and reestablish or preserve traditional neighborhood forms and pedestrian orientation. Development is characterized by mid-rise (two to four story) single-use buildings and detached and semi-detached residential buildings.~~

~~B. Lot standards.~~

- ~~1. Newly-platted lots must be dimensioned as specified by Table 4.~~
- ~~2. Lot coverage may not exceed the maximum specified by Table 4.~~
- ~~3. Building facades must have a minimum width that is equal to a percentage of a lot's width and is specified as the facade buildout on Table 4.~~
 - ~~(a) Facade buildout is calculated by dividing the total width of all facades at or forward of the maximum front setback by the lot width and may be cumulatively calculated by multiple buildings.~~
 - ~~(b) The open space of a forecourt is considered part of the building for the purpose of measuring building width and facade buildout.~~
 - ~~(c) The SPGA may provide relief from the facade buildout requirements; the Board must find the issuance of the special permit is consistent with the design and infrastructure plan.~~

Facade Build-Out

~~Single Building per Lot = $A \div B$ Multiple Buildings per Lot = $(A \div A) \div B$~~

~~C. Building standards.~~

- ~~1. Multiple principal buildings are permitted per lot.~~
- ~~2. Principal buildings are permitted as specified by Table 4.~~

§ 240-24.1.7

~~(a) Additional principal buildings are exempt from the required maximum front setback.~~

~~3. Principal building facade(s) must be built parallel to any primary front lot line, at or between the minimum and maximum front setbacks.~~

~~4. The fourth story of any building must be recessed ("stepped back") from the facade of the stories below at least eight feet.~~

~~5. Mechanical and stairwell penthouses and building systems equipment must be set back from any exterior wall a distance that is equal to their height.~~

~~D. Use provisions:~~

~~1. Limitations:~~

~~(b) Occupation of a single commercial space greater than 5,000 square feet by any food and beverage service or retail sales use requires a special permit.~~

~~(c) The maximum number of dwelling units permitted for any multiunit dwelling residential use is determined by the permitted dimensions of the building and the actual motor vehicle parking spaces provided on a lot as required by Table 2.1.~~

~~E. Site standards:~~

~~1. Driveways, vehicular entrances to parking lots or structures, and curb cuts may be no wider than 24 feet.~~

~~F. Landscape standards:~~

~~1. A front landscape area is not required if the front setback is zero. When a setback is greater than zero, those portions of the setback not occupied by pedestrian amenities and public spaces shall be landscaped including one canopy tree to be planted every 30 feet of frontage of the property.~~

BARNSTABLE TOWN CLERK

RE: Report of the Barnstable Planning Board to Town Council on Item No. 2026-006, a Proposal to Amend the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning, by repealing the Downtown Village District and amending the zoning map to replace the Downtown Village District with the Downtown Neighborhood Zoning District

Dear President Tamash,

The Planning Board held duly posted and noticed public hearings on September 22, 2025, October 27, 2025, November 24, 2025, and December 22, 2025 on the proposal to amend the Code of the Town of Barnstable, Part I General Ordinances, Chapter 240 Zoning, by repealing the Downtown Village District and amending the zoning map to replace the Downtown Village District with the Downtown Neighborhood Zoning District.

At the close of the public hearing, a motion was duly made and seconded to NOT recommend to Town Council adoption of the proposed zoning amendment, Item No. 2026-006 as written. The vote approving that motion was a 6-0 vote of members present.

During discussions Board members agreed with the concept of reducing building heights, bulk regulations, and density for properties on the outer limits of the downtown Hyannis zoning districts but expressed concern with repealing the entirety of the DV district. It was stated that the Town should incentivize redevelopment of underutilized and/or blighted properties. Keeping the DV district would allow for a tiered development pattern that may better achieve the original intent of the amendment by reducing building heights, bulk regulations, and density on the outer limits while also incentivizing redevelopment closer to the downtown core.

As such the Board has offered a suggested amended map that keeps the DV zoning intact along North Street and portions of Main Street, while converting much of the existing DV district to DN along the edges of the downtown Hyannis zoning district. A copy of the amended map is attached, as well as the existing zoning map for comparison.

Respectfully Submitted,

12-23-2025

Stephen Robichaud, Planning Board Chair

BARNSTABLE TOWN COUNCIL

ITEM# 2026-090

INTRO: 02/12/2026, 02/26/2026, 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark S. Ells, Town Manager
THROUGH: Chris Gonnella, Community Services Director
DATE: February 12, 2026
SUBJECT: Appropriation Order in the amount of **\$105,000** for the purpose of funding additional Fiscal Year 2026 operating expenses at the Town's Municipal Golf Courses

BACKGROUND: The use of credit cards and processing fees associated with their use continue to increase. Golf also experienced several critical failures of equipment that are detrimental to cultural practices and seasonal maintenance that needed to be replaced immediately. Golf also utilized Fiscal Year 2026 Operating Funds to make additional improvements to the Hyannis Golf Course clubhouse and adjacent areas during the construction project.

ANALYSIS: The \$105,000 request includes: \$15,000 to cover credit card fees, \$30,000 for unanticipated equipment replacement purchases, \$10,000 to cover custodial services, \$15,000 for a large-scale safety and drainage project around the perimeter of the practice putting green at Hyannis Golf Course, \$10,000 for new fencing to be installed along the upper parking areas at Hyannis Golf Course, and lastly \$25,000 for new driving range mats and equipment at both the Hyannis Golf Course and Olde Barnstable Fairgrounds Golf Course facilities.

FISCAL IMPACT: Funding for this appropriation is being provided from the Golf Course Enterprise Fund reserves. The Golf Course Enterprise Fund Reserves currently stand at \$1,917,132.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, recommends approval of this appropriation request.

STAFF ASSISTANCE: Chris Gonnella, Director of Community Services; Jesse Schechtman, Director of Golf; James Bentley, Director of Golf Maintenance

B. NEW BUSINESS (Refer to Public Hearing 03/26/2026)

BARNSTABLE TOWN COUNCIL

**ITEM# 2026-091
INTRO: 03/12/2026**

2026-091 APPROPRIATION ORDER IN THE AMOUNT OF \$250,000 FOR THE PURPOSE OF FUNDING THE BARNSTABLE PUBLIC SCHOOLS DISTRICT WIDE MECHANICAL UPGRADES PROJECT AS OUTLINED IN THE FISCAL YEAR 2027 – FISCAL YEAR 2031 CAPITAL IMPROVEMENT PLAN

ORDERED: That the amount of **\$250,000** be appropriated for the purpose of funding the Barnstable Public Schools District Wide Mechanical Upgrades Project as outlined in the Fiscal Year 2027 – Fiscal Year 2031 Capital Improvement Plan, including the payment of costs incidental or related thereto; and that to meet this appropriation, that **\$167,947** be provided from the General Fund Reserves; that **\$63,168** be provided from the remaining balance in Town Council order 2017-066, and that **\$18,885** be provided from the remaining funds in Town Council order 2022-128, and that the Barnstable School Committee is authorized to contract for and expend the appropriation made available for these purposes.

BARNSTABLE TOWN COUNCIL

ITEM# 2026-148
INTRO: 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark S. Ells, Town Manager
THROUGH: Jean B. Challies, Chief of Police
DATE: February 26, 2026
SUBJECT: Appropriation Order in the amount **\$104,927** for the Barnstable Police Department Fiscal Year 2026 Operating Budget for the purpose of funding the initial operating expenses for the hiring of 8 patrol officers

BACKGROUND: Six (6) patrol officer recruits will be starting the Plymouth Police Academy on June 20, 2026. Additionally, the Department will hire two (2) patrol officers who are lateral transfers from other police departments who are already academy-trained and experienced. At the time of the preparation and finalization of the Fiscal Year 2026 budget, the Police Department did not have confirmation on the number of vacancies that could be filled nor knowledge of the availability of police academy seats. The costs associated with the hiring of eight (8) police officers to fill current vacancies and to complete the hiring process (medical & psychological) requires a supplemental appropriation to the Police Department's Fiscal Year 2026 budget as follows:

Academy Bound New Hires

Training (6)	\$ 19,200
Uniform (6)	\$ 22,042
Equipment (6)	\$ 21,529
Ammunition (6)	\$ 8,792
Firearm (6)	\$ 5,932

Academy Trained New Hires

Uniforms (2)	\$ 5,707
Equipment (2)	\$ 5,923
Ammunition (2)	\$ 673
Firearm (2)	\$ 1,977

Medical & Psychological Assessments

Medical Exam for Recruits and Transfers (8)	\$ 8,752
Psych Assessments (8)	\$ 4,400

Other Equipment Previously Purchased for New Hires (Not Needed to be Purchased)

Radio's
ProBook's

TOTAL Fiscal Year 2026 Supplemental Budget Request – New Hires \$104,927

ANALYSIS: This supplemental appropriation request totals \$104,927 and is comprised of several parts: 1) pre-employment requirements including medical exams and psychological assessments; 2) academy tuition for recruits; 3) ammunition 4) equipment; and 5) uniforms. The items listed above will need to be funded in Fiscal Year 2026 in order to complete the hiring components required by the Plymouth Police

Academy. The academy-bound recruits require more uniforms, equipment and ammunition resulting in a slightly higher cost per recruit than the trained recruits.

FISCAL IMPACT: The funding provided by this request will not be included in the Police Department's base operating budget going forward. This is a one-time request associated with the hiring of this specific round of candidates. The General Fund Reserves will be used to fund these costs which have a current balance of \$34,213,836.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, recommends approval of this supplemental appropriation request.

STAFF ASSISTANCE: Jean B. Challies, Chief of Police; Anne E. Spillane, Finance & Support Services Director, Barnstable Police Department

BARNSTABLE TOWN COUNCIL

ITEM# 2026-149
INTRO: 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark S. Ells, Town Manager
THROUGH: Jean B. Challies, Chief of Police
DATE: February 26, 2026
SUBJECT: Transfer Order in the amount of **\$200,000** from the Fiscal Year 2026 Department of Public Works Personnel Operating Budget to the Fiscal Year 2026 Police Department Personnel Operating Budget

BACKGROUND: The Police Department has had numerous vacancies since the beginning of fiscal year 2026 due to retirements, resignations, and officers out on injury leave. This has resulted in the department having to fill many shift vacancies using overtime to meet minimum staffing requirements. Overtime is also impacted by unforeseen events such as the No Kings rallies. The department is budgeted overtime to cover shifts that are vacated due to vacations and other paid time off assuming full staffing but not for the shifts that must be covered due to long-term vacancies. Vacancy savings in the salary line are used to cover the additional overtime incurred but those savings are insufficient to cover shift costs that are 1.5 times the salary rate.

ANALYSIS: Vacancy savings in the Police Department are projected to be around \$760,000 and overtime is projected to be around \$960,000 over budget resulting in a \$200,000 project personnel cost deficit.

FISCAL IMPACT: Due to several vacancies in the Department of Public Works throughout the year, it is currently estimated that they will have more than \$800,000 in their personnel budget. It is recommended that a portion of these savings be transferred to the Police Department's personnel budget to cover the deficit.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, recommends approval of this transfer request.

STAFF ASSISTANCE: Jean B. Challies, Chief of Police; Anne E. Spillane, Finance & Support Services Director, Barnstable Police Department

BARNSTABLE TOWN COUNCIL

ITEM#2026-155
INTRO: 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark Ells, Town Manager
THROUGH: Daniel W. Santos, P.E. Director, Department of Public Works; Griffin Beaudoin, P.E.,
Town Engineer
DATE: February 26, 2026
SUBJECT: Transfer Order in the amount of **\$50,000** for the purpose of funding soil remediation associated with the removal of an underground storage tank discovered under the Guyer Barn parking lot.

BACKGROUND: In August 2025 while installing a requested walkway between Guyer Barn and Town Hall Parking Lot, the Public Works Department discovered an unknown, legacy underground storage tank (UST). The UST had an odor of hydrocarbons, so the Town retained a Licensed Site Professional (LSP) to assess the UST and schedule the removal of the UST. The UST was drained and removed in December without incident. The cost of the tank removal, LSP oversight and necessary testing was \$30,430. This has already been funded and is not part of this request. This request covers the estimated cost of the soil remediation.

On January 29th, the LSP notified the Town that the lab results of the soil samples that were collected under the tank had tested positive for contamination. As such, the Town now needs to remove the contaminated soil in the vicinity of where the UST existed. The work will include first completing soil borings to determine the extent of the contamination. Then a contractor will mobilize to remove the contaminated soil under the supervision of the LSP. This budget has been prepared assuming that the effort will require up to 10 soil borings to determine the extent of the contamination and that the contaminated soil removal does not exceed 40 cubic yards.

FISCAL IMPACT: This is an unforeseen expenditure and is eligible for funding from the Town Council's Reserve Fund. The Reserve Fund was originally budgeted at \$250,000 for Fiscal Year 2026. Town Council Order 2026-023 authorized \$175,000 of funding from this reserve leaving a balance of \$75,000. If this transfer is authorized, \$25,000 will be available in the fund for the remainder of Fiscal Year 2026.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, recommends approval of this transfer request.

STAFF ASSISTANCE: Daniel W. Santos, P.E. Director, Department of Public Works; Griffin Beaudoin, P.E., Town Engineer

BARNSTABLE TOWN COUNCIL

ITEM# 2026-156
INTRO: 03/12/2026

SUMMARY

TO: Town Council
FROM: Mark Ells, Town Manager
THROUGH: Daniel W. Santos, P.E. Director, Department of Public Works; Griffin Beaudoin, P.E.,
Town Engineer
DATE: February 26, 2026
SUBJECT: Transfer Order in the amount of \$406,000 for the purpose of funding costs associated
with storm debris removal

BACKGROUND: During the blizzard of February 22 & 23, 2026, the Town incurred extensive tree damage throughout its 450-mile roadway network. The damage included hundreds of downed trees and thousands of broken and fallen limbs that blocked or otherwise impeded full access to roads. Given the extent of the damage, it was not feasible to complete the clearing of roads utilizing exclusively Department of Public Work crews. Given that we are amid the winter snow season, it is important that we remove trees and limbs as soon as practicable so as not to impact snow clearing operations and the safety of the traveling public

This appropriation will allow the Town to contract storm debris removal with a firm that specializes in this work and have the crews, and large-scale equipment necessary to do the work efficiently and effectively.

FISCAL IMPACT: This transfer order will require the use of \$256,000 from Town Council order 2024-122, which will not be utilized and \$150,000 from Department of Public Works salary savings. The current amount of salary savings is over \$800,000.

TOWN MANAGER RECOMMENDATION: Mark S. Ells, Town Manager, recommends approval of this transfer order.

STAFF ASSISTANCE: Daniel W. Santos, P.E., Director of Public Works
